Intelligent Motorcycle Tracking Solution

The best choice

For your motorcycles

Introduction

Intelligent Telemetry provides a comprehensive Motorcycle Tracking Solution that is excellent for monitoring a range of motorcycles to improve motorcycle security, and offer you peace of mind. Our “petit” device, is compact, waterproof, and durable and can withstand harsh weather conditions. The Power Saver functionality ensures that the device can be deactivated when not in use to save the amount of power consumed by the battery.

The solution allows you to:

- Track, monitor and control the movement and routes used by your motorbicycles online on our easy to use, customer-friendly web interface
- Monitor, track and control your motorbicycles easily via email on your mobile phone
- Make sure your motorbicycles do not cross agreed boundaries (Geofencing Institution)
- Receive alerts whenever any of your motorbicycles are involved in accidents (Shock Sensor Alert)
- Know when the tracking device in any of your motorbicycles has been tampered with (Tamper Alert)
- Enable over-speeding checks for your motorbicycles (Alarms)
- Know when your engine is turned on/off with location and time
- Receive monthly reports outlining the movement and compliance of your fleet for up to 3 months

Our flexible web-based platform provides the following services:

- Track your motorbikes 24/7/365: Know where your dispatch motor riders are at any time of day. Monitor the location and usage of your motorcycles. Our devices employ quad-band technology. This means they support four different radio frequency bands, thus, they are compatible with most GSM networks worldwide.
- Eliminate losses incurred as a result of false reporting: Our solution allows you to obtain first-hand, detailed information on your motorcycles, right in your office. Know and get the exact records of routes and parking locations of motorcycles, days the motorcycles worked, and how long the motorcycles worked, for billing and management purposes.
- Overview of trips, parking and stop times: Our solution allows you to obtain detailed motorbike activity records. Your data is stored on our system for up to 3 months and may be retrieved at any time during that period.
- Monitoring via your mobile phone: With our GSM tracking solution you will have access to the whereabouts of your motorcycles everyday, all day, directly on your smart or feature phone.

Benefits

- Longer lifespan of motorbikes: Servicing Reminders (Alarms) can be set to keep your motorbikes up to date on all preventative maintenance, ensuring longer lifespan of your motorbikes.
- Lower Fleet Fuel Costs: Ensuring that dispatch riders reduce their speed will help to reduce fleet maintenance costs and fuel consumption, saving your business 10%-15% on your fuel bill each month.
- Eliminate unauthorized use of motorbikes: Eliminating unauthorized use of motorbikes can significantly reduce fuel and maintenance costs.
- Monitor over-speeding and driver behavior: Driver behavior such as acceleration, heavy breaking and over-speeding can be monitored by enabling over-speeding checks (Alarms). This will help to reduce the incidence of Road Accidents, saving you considerably on repair costs.
- Geofencing: With the creation of virtual boundaries, a notification is received as soon as your motorbikes cross set boundaries or leave a secured parking space.
- Ignition On/Off Alert: With this feature, a notification is received anytime the engine of the motorbike is started and move.
- Increased fleet and driver security: With the SOS help alert, staff can quickly be located and assisted as and when required.

VALUE FOR YOU

Our solution will enable you to get a ready-made, comprehensive and integrated solution for monitoring all your motorbikes. With our automated reports and data, you will get automatic reportin alerts and warnings via emails and mobile prompts to ensure prompt response to any eventualities.
